

NVU 71-73 MUSTANG INSTALLATION KIT INSTRUCTIONS

KIT CONETENTS:

- Gauge package
- 2 mourning brackets (driver and pass side)
- 1 2-1/16" gauge mounting bracket (optional)
- 4 #8x1" screws
- 1 Center filler panel
- 1 Center filler lighting panel
- 1 Light bulb

To install mounting brackets:

Remove dash bezel, remove original gauges, retain screws.

-Place gauges in brackets as shown. Back of each bracket is marked with a D for driver side and a P for pass side. (fig 1) Gauges will nestle down in bracket. Bracket acts as a spacer to properly hold gauges in place.

-Place gauges/brackets into openings and secure from rear (fig 2)

- Check for proper alignment from front, use back clamps to secure gauges if needed.

Install center filler if required with original mounting screws

- Install light backer as shown (fig 2) and wire ground to one terminal of bulb, switched 12V+ to other terminal for night illumination

- Follow wiring instructions in booklet for gauge wiring/installation

OPTIONAL: Replace center filler with 2-1/16" gauge holder to install any NVU 2-1/16" matching gauge.
